

# Antoni Pietryga

## Fullstack & Trainer

### Summary

I started programming in 2014 to develop a speedway game. As my needs grew, I became familiar with the LAMP stack, which enabled me to secure my first freelance projects. In 2018, I founded a business focused on digital skills training. After two years, I began conducting front-end programming courses. Since May 2022, I have been working as a B2B contractor while occasionally continuing to teach programming courses.
